

InfraRed Capital Partners – London Office

What we do

InfraRed manages specialist funds creating value by investing in projects in infrastructure and real estate. With over 15 years experience in structuring and actively managing assets, we identify and develop compelling investment opportunities for a diverse, global group of investors.

Our location and history

Employing approximately 80 staff, InfraRed is headquartered in London with offices in Hong Kong, New York and Paris. Our history dates from 1990 when, as Charterhouse Bank, we began investing in real estate, in due course expanding to encompass infrastructure investments. In 2000, we were acquired by HSBC and rebranded as HSBC Specialist Investments Limited ('HSIL').

In April 2011 the business was acquired by its management and re-branded as InfraRed Capital Partners.

Our business

InfraRed is one of the longest standing active investors in infrastructure, with an investment and advisory track record of over 15 years, and has been an active investor and manager in real estate for 20 years.
